

Eight-Constitution Medicine

8체질의학

What is Eight-Constitution Medicine (ECM)? 8체질의학이란...

"Eight-Constitution Medicine is not a means of differentiating race, family lineage, appearance nor intellect; it is a means of classifying individuality. Individuality is a unique nature apart from one's species. Eight different types of human individuality exist as eight constitutions, which are not solely mental or physical but encompass all traits. The civilized, the barbaric, people of all color, males, females—all individuals are categorized into eight constitutions. This has been so since the past, it is so in the present, and this is how it will be in the future.

- Dowon Kuon, Founder of Eight-Constitution Medicine -

"체질은 혈통이나 인종의 구분이 아니며, 형태나 인지(人智)의 구분도 아닌 개성의 구분이다. 개성이란 같은 종(種)에서 구별되게 나타나는 본성적 구분을 말한다. 인간의 개성은 8인데, 정신적인 것만도 아니고 육체적인 것만도 아닌 전체적으로 나타나는 8개성을 인간의 8체질이라고 한다. 문명인도, 야만인도, 백인도, 흑인도, 황인도, 남자도, 여자도 다 같이 8체질로 나뉜다. 과거에도 그러하였고 현재에도 그러하면, 미래에도 영원히 그러할 것이다."

- 8체질의학 창시자 권도원 -

Eight-Constitution Medicine, founded by Dr. Dowon Kuon(1921-present / Director of Jesun Acupuncture Clinic and Dawnting Cancer Research Institute in Korea), was first introduced in 1965 in Japan at The International Congress of Acupuncture & Moxibustion. Ever since its first introduction, Eight-Constitution Medicine, a completely novel medical paradigm, cured many patients with intractable and incurable diseases.

8체질의학은 대한민국의 권도원박사(1921-현재/제선한의원 원장)에 의하여 창시되어, 1965년도 일본 국제침구학회에서 국제적으로 발표된 이래, 전혀 새로운 의학적 패러다임을 제시함으로써 수 많은 난치 또는 불치질환을 정복하는 명실공히 새 의학으로 자리 잡아 왔다.

Eight Constitutions 8체질

The eight constitutions each consist of a different dynamic order between twelve organs, which include: the heart, the lung, the pancreas, the liver, the kidney, the small intestine, the large intestine, stomach, the gall bladder, the bladder, the sympathetic nerve and the parasympathetic nerve of the autonomic nervous system. The eight different dynamic orders physically and mentally form eight distinct individualities, which hence are the eight constitutions: Hepatonia(Mok-Yang Chejil), Cholecystonia(Mok-Eum Chejil), Pancreotonia(To-Yang Chejil), Gastrotonia(To-Eum Chejil), Pulmotonia(Geum-Yang Chejil), Colonotonia(Geum-Eum Chejil), Renotonia(Soo-Yang Chejil) and Vesicotonia(Soo-Eum Chejil)

8체질이란, 심장, 폐장, 췌장, 간장, 신장, 소장, 대장, 위, 담낭, 방광 그리고 자율신경의 교감신경, 부교감신경의 12기관의 기능적인 강약배열의 8개 구조를 말한다. 그 장기들의 강약배열의 8구조는 육체적, 정신적으로 보이게 안보이게 서로 다른 8개의 개성을 이루고 있는데 이것들을 8체질이라고 한다. : 목양체질(Hepatonia), 목음체질(Cholecystonia), 토양체질(Pancreotonia), 토음체질(Gastrotonia), 금양체질(Pulmotonia), 금음체질(Colonotonia), 수양체질(Renotonia), 수음체질(Vesicotonia)

Name of Constitution (English)	Name of Constitution (Korean)	Name of Constitution (Chinese)	Five Elements of Constitution
Hepatonia	목양체질, Mok-Yang Chejil	木陽體質	Wood +
Cholecystonia	목음체질, Mok-Eum Chejil	木陰體質	Wood -
Pancreotonia	토양체질, To-Yang Chejil	土陽體質	Earth +
Gastrotonia	토음체질, To-Eum Chejil	土陰體質	Earth -
Pulmotonia	금양체질, Geum-Yang Chejil	金陽體質	Metal +
Colonotonia	금음체질, Geum-Eum Chejil	金陰體質	Metal -
Renotonia	수양체질, Soo-Yang Chejil	水陽體質	Water +
Vesicotonia	수음체질, Soo-Eum Chejil	水陰體質	Water -

Hepatonia/木陽體質 목양체질

Hepatonia is characterized by its superior or strong liver (gall bladder) and inferior lungs (large intestine). This constitution also is recognized for having a considerably strong kidney (bladder) and relatively weak pancreas (stomach).

Hepatonias are usually quiet and reserved. Because they tend to be realistic and skilled in determining situations, they usually maintain a large network of relationships. Hepatonias are also likely to be overly ambitious about achieving results rather than appreciating the process of working, which can potentially lead to unsuccessful outcomes.

A meat diet will cause this individual to sweat more frequently and fall asleep easily; however, easy sleep and frequent sweat are signs of good health for a Hepatonian. Activities that cause sweating, such as sports and sauna, will help relax the naturally-excited liver and permit good health.

Naturally high blood pressure is common for a Hepatonian; therefore, he or she must be cautious when taking medication for high blood pressure. Hepatonian patients with lower abdominal indigestion, arthritis, skin diseases, depression, or high cholesterol, are encouraged to avoid seafood and increase meat intake. Drinking wine is harmful to a Hepatonian as well.

- 말이 없고 과묵한 형, 현실적이며 상황판단이 빠르고, 대인관계 넓은편
- 과정보다는 성과에 집착하여 무리한 추진하는 경향
- 육식을 하면 잠과 땀이 많아지는데 이는 건강의 신호
- 땀을 많이 흘리는 운동, 사우나는 건강에 유익
- 본태성고혈압 많은 체질(혈압약 사용주의)
- 대장질환, 관절염, 피부질환, 우울증 또는 고지혈증이 나타나면 해물섭취 중단하고 오히려 육식해야함.

Cholecystonia/木陰體質 목음체질

Cholecystonia is characterized by its superior or strong gall bladder (liver) and inferior large intestine (lung). This constitution also is recognized for having a considerably strong small intestine (heart) and a relatively weak bladder (kidney).

Cholecystonias are often simple, quick in making decisions, and adaptable. They are naturally charitable and sociable, which enables them to maintain a large network of relationships and to easily adapt to various social environments. Their natural athleticism and developed muscles, especially enhanced with a meat diet, permit these individuals to be excellent athletes. When healthy, Cholecystonias require plenty of sleep.

Frequent bowel movement and discomfort in the lower abdomen is common for Cholecystonias who consume seafood often because seafood further suppresses an already weak large intestine and stimulate naturally-excited gall bladder and liver, causing illness. Consumption of seafood may also cause arthritis, skin problems, high cholesterol, and obesity. When ill, Cholecystonias tend to lose their charitable nature, grow negative and anxious, which can eventually cause insomnia or depression.

- 매사에 결정빠르고 생존능력 강함
- 관대하고 사교적, 대인관계 넓고 사회생활에 적응 빠름
- 육식은 타고난 운동신경에 발달된 근육을 더하여 거의 모든 운동에 능하게 함
- 건강할때는 잠이 많다.
- 하루 서너번씩 대변을 보는 하복부 불편, 만성설사의 원인은 주로 잦은 해물 섭취로인함
- 해물은 관절염, 피부질환, 우울증, 고지혈증 또는 비만의 원인이 됨
- 건강하지 못할경우 관대함이 없어지고 불안감과 불면증에 시달리게 됨.

Pulmotonia/金陽體質 금양체질

Pulmotonia is recognized for its superior lung (large intestine) and inferior liver (gall bladder). This constitution also has a relatively strong pancreas (stomach) and considerably weak kidney (bladder).

Pulmotonias' natural creativity and careful discretion makes them perfectionists and unlikely to make mistakes. Because they are principled, they are known to be fairly consistent and professional. Their acute sense of hearing gives them great potential in pursuing music.

Having a tendency to be overly sensitive and unrealistic idealists, they rarely maintain a large circle of friends but keep meaningful relationships with a few.

Meat oriented diets and unnecessary medication will harm the weak liver even further and cause Pulmotonias to develop not only all kinds of illnesses but also negative and passive attitudes. Pulmotonias usually do not enjoy sports because they often feel weak after perspiring.

- 창의적이고 사려가 깊어 실수가 적고 완벽주의자가 많음
- 주관이 뚜렷하여 매사에 일관성과 전문성을 나타내는편
- 청각이 발달하여 음악적 소질이 있음
- 과민하고 비현실적인 이상주의로 대인관계가 넓지 못하고 좁고 깊은편
- 체질에 맞지 않는 육식과 약물복용은 건강을 상하여 부정적이고 수동적인 성격의 갖게함. (*아토피피부염, 알러지질환)
- 땀을 많이 내면 기력이 쇠하여 지므로 운동을 그다지 좋아하지 않는편

Colonotonia/金陰體質 금음체질

Colonotonia is characterized by a superior large intestine (lung) and inferior gall bladder (liver). This constitution is also recognized for a considerably strong bladder (kidney) and relatively weak small intestine (heart).

Colonotonias tend to be cheerful, adventurous, emotional and sensitive. Their careful discretion and consistent nature permits them to have many different talents and expertise. Their acute hearing gives them great potential in pursuing music. They also tend to have good friendships with various types of people. Colonotonias tend to be negative, passive, stubborn and suspicious when they are unhealthy as a result of consuming inappropriate diets.

Consumption of meat and medication will not only cause chronic fatigue, indigestion, kidney failure, lupus, but will cause various types of intractable muscle disease like multiple sclerosis, Parkinson's disease, etc. Excessive perspiration may also cause Colonotonias to be easily fatigued.

- 명랑, 진취적, 감성적으로 민감.
- 사려가 깊고 일관성이 있어 다양한 재주와 전문성 나타냄
- 청각 예민하여 음악적 재능있고 대인관계는 다양하고 원만한 편
- 건강이 상하면 부정적으로 소심해져서 의심이 많아지고 자기주장이 지나치게 강하여짐.
- 지나친 육식과 약물복용은 만성피로, 소화불량, 신부전, 자기면역질환등뿐 아니라 근육력, 파킨슨씨병등의 다양한 난치 근육질환의 원인이 됨.
- 땀을 많이 내면 만성피로감이 쉽게 온다.

Pancreotonia/土陽體質
토양체질

Pancreotonia is characterized by a superior pancreas (stomach) and inferior kidney (bladder). This constitution is also recognized for its considerably strong heart (small intestine) and relatively weak lungs (large intestine). Pancreotonias are usually restless, proactive, and sensible. Because they are naturally positive and passionate, they often achieve good outcomes quickly. They have exceptional sense of color, which also gives them great potential in pursuing fine arts and fashion. Pancreotonias are socially active, straightforward, positive, and possess a strong sense of justice. However, they tend to be impatient, relatively prone to misspeaking, offended and upset easily but overcome such emotions quickly. Because of their strong pancreas and stomach, Pancreotonias have a hearty appetite and may have a hard time restraining their hunger. If they consume spicy foods, chicken, apples, and herbal medicine, they will add heat to their strong pancreas, which will make controlling their appetite more difficult. Consumption of such foods may also cause them to be more susceptible to diabetes, and grow more impatient.

- 부지런하고 활동적이며 센스가 빠르다.
- 매사에 긍정적이고 열정적임.
- 풍부한 감성과 발달된 색감으로 패션이나 미술에 재능을 보임
- 대인관계 매우 적극적이며 사교적임.
- 직선적이고 밝으며 정의감 풍부함
- 매사에 서두르는 경향이 있어 일이나 말에 실수가 잦음.
- 감성적, 쉽게 노여워하고 슬퍼하지만, 쉽게 잘풀고 잘 잊는편.

Gastrotonia/土陰體質
토음체질

Gastrotonia is characterized by its superior stomach (pancreas) and inferior bladder (kidney). This constitution is also recognized for its relatively strong large intestine (lung) and relatively weak gall bladder (liver). Gastrotonias are difficult to meet because they are rare. Gastrotonias tend to be honest, active, positive and meticulous. Because they are sensible and responsible, they are conscientious and devoted workers. Their efficient and accurate sense of vision gives them a good sense for aesthetics. Although they appear generous, they tend to be straightforward and strict with others. Because of their tendency to be impatient and sensitive, they are not particularly social. Gastrotonias' strong and tense stomach often causes indigestion. Their digestive problems are often accompanied by chronic headaches and pain throughout the body. Herbal medicine and antibiotics can cause severe side effects for this constitution. Spicy foods, chicken, apples, and herbal medicine not only cause digestive problems, but can also result in anxiety disorder and malfunction of autonomic nervous system.

- 정직하고 활동적이며 매사에 긍정적이고 섬세함.
- 센스가 빠르고 책임감이 강해 주어진 일에 성실함.
- 시간이 발달하고 정확하여 미적감각 뛰어남
- 마음이 여러 관대해 보이나 직선적이며 원칙론자인
- 위장이 지나치게 강하고 예민해서 오히려 소화불량이 잦음.
- 소화문제서 두통 및 전신증상 발전 쉽고, 한약이나 항생제 등의 약물로 인한 부작용이 심한편임.
- 매운음식, 닭고기, 사과 또는 보약등은 만성소화불량뿐 아니라 불안증 및 다양한 자율신경실조현상을 일으킴.
- 급하고 소심한 면이 있어 그다지 사교적이지 못한편.

Renotonia/水陽體質
수양체질

Renotonia is characterized for its superior kidney (bladder) and inferior pancreas (stomach). This constitution is also recognized for a relatively strong lung (large intestine) and considerably weak heart (small intestine). Renotonias are composed, patient, and cooperative. They also have a tendency to be perfectionists. They are good listeners, who can patiently hear the thoughts and concerns of others, and they rarely express anger. Renotonias have social skills, which allow them to perform profoundly in service-related fields. They have detail-oriented and suspicious personalities, which cause them to keep things to themselves and not trust others well. Renotonias often have complaints about chronic constipation but it will never develop into a severe illness. When healthy, Renotonias will not sweat; however, they will frequently perspire when unhealthy. Therefore, they can easily catch illnesses during the hot summers and feel healthier during fall and winter seasons. Consuming cold foods or drinks often causes digestive problems.

- 침착하고 인내심 강하며 조직적이며 완벽주의경향
- 다른사람들의 말과 생각을 끝까지 잘 들어주며 여간해서는 노하는 모습을 보이지 않음.
- 대인관계 넓고 원만, 사람들을 대하는 서비스업에 유능
- 세밀하고 의심이 많아 남의 말을 잘 믿지 않으며 자신의 속을 잘 내보이지 않는 경향
- 변비증이 흔히 있으나 그다지 힘들지 않음.
- 건강할때는 땀이 없고 몸이 허약해지면 땀이 많아져 더운 여름에 몸을 쉽게 상하고 오히려 가을, 겨울에 건강해지는편.
- 냉한 음식은 만성 소화불량증의 원인 됨.

Vesicotonia/水陰體質
수음체질

Vesicotonia is characterized by its superior bladder (kidney) and inferior stomach (pancreas). This constitution is also recognized for having a relatively strong gall bladder and considerably weak large intestine (lung). Vesicotonias are gentle, collected, cool, and realistic. Because they are reserved and patient, they are good listeners. Thus, Vesicotonias tend to be profound candidates for work, which requires patience, few mistakes, attentiveness to detail, and sensitivity. When ill, they can grow greedy, negative, cold, stubborn, suspicious and close-minded easily. Consumption of cold foods or drinks will further weaken the naturally weak stomach, causing diseases that are difficult to treat. During summers, when cold food is often preferred, Vesicotonias tend to be prone to illnesses; warm foods and beverages, light eating throughout the day, and infrequent perspiration will permit good health.

- 부드럽고 유한성격의 소유자이면서 동시에 냉철하고 강단이 있음.
- 과묵, 인내심이 많아 상대방의 말을 잘 들어주는 편이며, 차분하고 실수가 적어 예민함과 세심함을 필요로 하는 일에 능함.
- 몸이 허약해지면 과묵과 의심이 많아서 매사에 부정적, 냉정, 단호하여지고 폐쇄적인 모습되기 쉬움.
- 온도적으로 기능적으로 냉한 음식은 약한 위장을 더욱 무력하게 하여 치료하기 어려운 위장질환을 일으킴.
- 땀이 많이 나고 냉한 음식을 선호하는 여름철에 몸이 쉽게 상하므로 더운음식을 취하고 항상 소식하며 땀을 방지하는 것이 건강법.

"The descriptions above illustrate general tendencies of each constitution and are not absolute"

"위의 내용은 일반적인 체질별 성향을 설명한 것으로, 절대적인 체질적 특성이 아님을 밝힘"

How to diagnose the eight constitutions

8체질 진단법

The constitution of an individual can be identified by taking the pulses on the radial artery of both wrists. This method, which differs from traditional pulse-taking in oriental medicine, finds a pulse formation among eight different pulse formations, each associated with a particular constitution. The eight pulse formations are inborn and inalterable.

8체질의 진단법으로는, 8체질의 8개 맥상 중 하나를 양 손목의 요골동맥에서 찾아내는 역사상 유일한 8체질 맥진법으로, 전통맥진법과는 완전히 구분되며, 태어나면서부터 죽는 시간까지 변하지 않는 8개의 맥상을 찾아내는 방법이다.

The cause of an illness

질병의 원인

Eight-Constitution Medicine, utilizing the understanding of physiology and pathology of each innate constitution—each unique with its own dynamic association between internal organs, strives to maintain the patient's best possible condition of health by enhancing the immune function up to its optimal state, not only via preventative measures but also through therapeutic treatments.

When the dynamic order of organs is harmonious, the body is said to be in a 'suitably unbalanced state' and is deemed healthy. When a strong organ becomes stronger, and a weak organ becomes weaker, the body falls into an inadequate state, or 'overly unbalanced state', which implicates sickness. An overly unbalanced state usually intensifies the inadequacy of each organ and, in turn, leads to the deterioration of overall immune function and the malfunction of organs and autonomic nervous system, which could potentially cause physical and mental symptoms.

8체질의학은 각 체질마다 다르게 타고나는 인체 내 장기들의 8가지 다른 강약 배열구조에 따르는 각 체질의 생리와 병리를 이해하여 질병을 예방, 치료할 뿐 아니라, 인체의 모든 면역기능을 최상의 상태로 유지하게 하는 인간 8체질의학이다.

각 체질마다 장기강약배열구조가 조화로운 상태, 즉 적불균형 상태를 건강한 상태라고 한다. 반면, 부조화의 상태, 다시 말해서 강한 장기가 지나치게 강하여지고 약한 장기가 지나치게 약하여진 과불균형 상태를 질병의 상태라고 한다. 과불균형 상태는 각 장기의 부조화 상태를 심화하여 전체적인 면역기능 저하 및 각 장기의 이상기능뿐만 아니라 자율신경실조현상을 초래하여 다양한 육체적 정신적 증상들을 유발한다.

Eight-Constitution Acupuncture Treatment

8체질 침치료법

The method of Eight-Constitution acupuncture treatment is remarkably different from the methods used in the past 5000 years of acupuncture history. Eight-Constitution Medicine is a type of immunotherapy and approaches to treat the cause of an illness through restoring the weakened or dissipating immune system by changing the overly-unbalanced state of organs into a suitably-unbalanced state.

8체질의학에서 사용되는 치료방법은 5000년 침의 역사상 새로운 침법으로, 장기구조의 과불균형을 적불균형으로 전환하여 감소되었거나 소멸된 면역을 다시 복구시키는 원인치료 또는 면역치료법이다.

Eight-Constitution Regimen

8체질 섭생법

Eight-Constitution Medicine also encourages patients to follow constitutional regimens, depending on his or her constitution, in order to prevent and treat illness. For example, patients should consume foods that would stimulate rather than suppress weak organs; they should also consume foods that would suppress rather than stimulate strong organs. Over time, such dieting will convert the body from an overly-unbalanced state of organs to a suitably-unbalanced state.

An illness should be treated according to the patient's constitution, since the cause and development of the sickness may differ depending on the patient's constitution. Any food, medication, or medical treatment that is beneficial for one person may not be useful for another. This is because the two patients may not have the same constitution even though their symptoms and diagnosis appear the same. Living environment, occupation, hobbies, sports and other activities also affect one's health; the degree and type of effect will vary for each constitution. Thus, a healthy daily life can only be achieved through a deep understanding of one's constitution, following the appropriate constitutional regimen, and receiving the proper acupuncture treatment matched to one's constitution.

8체질의학은 또한 체질에 맞는 섭생법을 통해서도 질병을 치료하고 예방한다. 각 체질의 약하게 타고난 장기를 억제하는 음식은 금하고 대신 촉진하는 음식을 섭취함과 동시에, 강하게 타고난 장기를 억제하는 음식을 섭취하고 대신 촉진하는 음식은 금하는 방법을 사용하여 과불균형을 적불균형으로 전환시키는 치료법이다.

그러므로 같은 질병이라 할지라도 서로 체질이 다른 경우, 그 질병의 원인 뿐 아니라 치료방법 또한 달라져야 하며, 또한 다른 사람에게 유익한 음식, 약 또는 치료방법이라 할 지라도 나에게서는 유익이 되지 않거나 오히려 해가 될 수 있는 것은 서로 다른 체질의 차이에서 오는 것이라 하겠다. 뿐만 아니라, 거주, 직업, 운동, 취미, 약물 등 여러 환경적 요소를 또한 각 체질에 미치는 영향력이 다를 수 있으므로, 과연 일생을 통한 참된 건강은 자신의 체질에 관한 깊은 이해를 통한 적합한 섭생과 치료의 선택을 통해서만이 가능하다고 말하지 않을 수 없다.

Past, Present and Future of ECM
8체질의학의 과거, 현재 그리고 미래

Eight-Constitution Medicine is a new paradigm, with an entirely new perspective on human bodies. Vigorous research and clinical studies have proven its ability to fight incurable, terminal diseases and illnesses around the world. A progressive effort in this novel field provides infinite possibilities and visions for the well-being and harmony of humanity.

8체질의학은 인체에 관한 전혀 새로운 시각, 새로운 패러다임으로 오늘날 연구와 임상을 통해 수 많은 난치병과 불치병을 정복하는 성과를 이루어 내며 발전하고 있으며, 인류의 건강과 조화를 향한 무한한 가능성과 비전을 제시하고 있다.

“The doctor of the future will give no medicine, but will interest his patients in the case of human-frame, in diet, and in the cause and prevention of disease.”
- Thomas Edison -

“미래의 의사는 환자에게 약을 주기보다는 환자의 체질과 음식과 질병의 원인과 예방에 관심을 기울이게 될 것이다.”
- 토마스 에디슨-

Areas of Specialization
전문진료분야

All kinds of Chronic Pain
모든종류의 통증

Diabetes, Obesity, Metabolic syndrome
당뇨, 비만, 대사증후군

Chronic allergic diseases (eye, nose, throat, skin etc)
알러지질환(결막염, 비염, 기관지염, 피부염등)

Atopic dermatitis
아토피성 피부염

Chronic GI tract troubles(esophagitis, indigestion, Gastritis, IBS, colitis, UC, crohn's disease etc)
만성소화기문제(식도염, 소화불량, 위염, 과민성대장증후군, 장염, 궤양성대장염, 크론씨병등)

Chronic inflammatory diseases (urethra, bladder, uterus etc)
각종 만성염증질환(요도염, 방광염, 자궁염등)

Menstruation-related disorders
생리관련문제(생리전후증후군, 생리통, 생리불순, 무월경등)

Infertility
불임

Menopausal syndrome
갱년기증후군

Chronic fatigue syndrome
만성피로증후군
